Seu controle remoto

4-5
indication light is off
el indicador apaga
Luz indicadora extingue

1. Hold on the device button which you need to learn, such as "TV" (SAT / DVD / CBL ...) button, or "SET" (S / Learn) button for about 3 seconds. Release it when the work indicating lamp lights up.
2. Aim the top of the original remote control to the top of this remote control at a distance of 1-3CM. Press the button of the original remote control which needs to learn, such as, 'VOL +' button, and the work indicating lamp of this remote control will flash.
3. Press on the corresponding button of this remote control which needs to learn, such as, 'VOL +' button. It represents that this button has successfully learned when the work indicating lamp flashes quickly and then into the long bright state.
4. Repeat steps 2-3 if other buttons of this device need to learn.
5. Click the "TV" button, or "SET" (S / Learn) button, then the indicator light will be out and the learning set is exited.

Note:

In the circumstances of multiple learning pages exist in this remote control, press the corresponding device button that demands to be set up will help to enter into the learning state when it needs to learn other device pages.

ONE KEY LEARNING SETTINGS

Note: A and B are exactly the same learning remote control.

A: Remote control which has been completely learned.

B: Remote control which needs one key learning copy.

- Operation Of B Remote Control:

1. Press the device button (such as 'TV / SAT / DVD') and 'CH-' button simultaneously, then the work indicating lamp will flash, and then it enters into the learning receiving state.

2. Align the transmitting end of A to the receiving end of B.

- Operation Of A Remote Control:

Press the device button (such as 'TV / SAT / DVD') and 'CH +' button simultaneously, and the work indicating lamp will flash three times quickly until it turns off. (It means A remote control has successfully transmitted all the signals to B remote control. One key learning has completed)

Note:

- Make sure that every function key is learned successfully. If not, pls relearn it.

- Learn from IR originals only

- For some special originals, it might be failed in copying or have to repeat learning the function keys for successfully usage.

Observação:

- Para garantir que a chave fez uma cópia sucedida durante a configuração. Se não, por favor re-copie a função.

- Apenas para controle remoto infravermelho.

- Pouco controle remoto infravermelho de onda portadora especial não pode ser útil, ou configuração de repetições necessária.

Observación:

- Favor de garantizar que las teclas tengan copia durante la configuración, de lo contrario, favor de recibir la función de estudio.

- Sólo es aplicable para el control remoto del infrarrojo.

- Algunos controles remotos de onda portadora especial pueden ser no útil, o se necesita la configuración de repeticiones.
